2015 Publications

Giovanni publications in the year 2015

Links to papers or abstracts are provided below. If any erroneous links are found, please report them to the GES DISC Help Desk, gsfc-help-disc@lists.nasa.gov. The availability of the full paper at the link below is dependent on institutional subscriptions to the journals. Libraries, particularly in academia and government, are likely to have subscriptions to many of these journals, allowing readers to download the full version of the publications. In some cases, only a PDF version of a preprint, a pre-publication draft, or an “in press” version of an accepted paper is available at this time.

Castaldi, F., Casa, R., Pelosi, F., and Yang, H. (2015) Influence of acquisition time and resolution on wheat yield estimation at the field scale from canopy biophysical variables

Farahat, A., El-Askary, H., and Al-Shaibani, A. (2015) *Study of aerosols’ characteristics and dynamics over the Kingdom of Saudi Arabia using a multisensor approach combined with ground observations*. Advances in Meteorology, Special Issue "Remote Sensing and Modeling of
